PATENT APPLICATION

UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of : Josef WEILAND  
Serial no. : 10/533,108  
Filed : with an effective filing date of October 16, 2003  
For : DEVICE AND METHOD FOR MACHINING  
WORKPIECES  
Group Art Unit : 3723  
Examiner :  
Docket : LORWER P37AUS

The Commissioner for Patents  
U.S. Patent & Trademark Office  
P. O. Box 1450  
Alexandria, VA 22313-1450

**INFORMATION DISCLOSURE STATEMENT**

Dear Sir:

In connection with this matter, the Applicant hereby attaches United States Patent Office Form PTO/SB/08a and copies of the information listed in the enclosed PTO/SB/08a form, unless otherwise indicated on such Form.

The enclosed documents include copies of several prospects of a competitor of the Assignee of the above identified application as well as from other companies. Most of the documents do not indicate a publication date so that the Applicant is uncertain whether such documents are, in fact, published before or after the priority date of the above identified application.

Most of the enclosed documents refer to an apparatus for cleaning a wood workpiece in strip or plate form and are thus not believed to be particularly relevant to an apparatus for machining a metallic workpiece, as recited according to independent claim 39, for example, of the presently claimed invention.

The documents which refer to machining a metallic workpiece do not include a revolving conveyor device with at least one brush wherein the conveyor device guides the at least one brush at least approximately linearly past the region of the workpiece that is to be machined, obliquely or transversely with respect to a direction of advance of the workpiece, according to independent claim 39.

The enclosed document from "Paul Ernst Maschinenbau GmbH" having the headline "Sonderausführung Reinigen und Entgraten nach dem Schneiden" (Document C1, page 4), shows a rotating roller.

The further documents just showing brushes which could be arranged in a revolving conveyor device, but those documents fail to describe how the brushes should be used,

10/533,108

especially if these brushes can be used for machining a metallic workpiece in the manner described in independent claim 39 of the presently claimed invention, for example.

As mentioned before, the documents showing a revolving conveyor device which is provided with at least one brush wherein the conveyor device guides the at least one brush at least approximately linearly past the region of the workpiece, obliquely or transversely with respect to a direction of advance of the workpiece, refer only to cleaning of the workpieces made of wood and not to machining a metallic workpiece in strip or plate form.

In the event that there are any fee deficiencies or additional fees are payable, please charge the same or credit any overpayment to our Deposit Account (Account No. 04-0213).

Respectfully submitted,

Michael J. Bujold, Reg. No. 32,018
